Title of Research: Human Behaviour Recognition using Wearable Sensors
Researcher: Jordan Frank, Ph.D. candidate, Computer Science **Supervisor:** Doina Precup; tel: (514) 398-6443
Contact Information: Tel: 514-398-7071 ext. 09587 ; email: jordan.frank@cs.mcgill.ca

Purpose of the research: To detect and recognize patterns in data collected from non-intrusive wearable sensors for the purpose of understanding any analysing human behavior.

What is involved in participating: You will wear or carry a small wearable sensor, which will capture data about your motion (from accelerometer sensors), the temperature and barometric pressure in your current environment, the amount of ambient light, as well as your GPS coordinates (when the sensor is worn outdoors and within GPS satellite range). You may also be asked to keep a log of your activities while wearing the device, or you may be accompanied by a researcher who will record the activities being performed.

Your signature below serves to signify that you agree to participate in this study.

Your participation is entirely voluntary and you can choose to decline to participate or even to withdraw at any point from the study. Due to the sensitive nature of this data, all of the collected data will be reported in such a way as to make direct association with yourself impossible. My pledge to confidentiality also means that the data will be coded and stored in such as way as to make it impossible to identify them directly with any individual (e.g. they will be organized by number rather than by name). This data will only be made available in its original form to the other investigators on this project. The data may be shared with other researchers studying related research, however, it will scrubbed of any identifying information, and provided in an anonymised format.

Consent: I wish to participate in this study ____YES   _____NO

I have read the above information and I agree to participate in this study
